

# PALIGRAF®

dégradables

ORANGE

MADE IN  
FRANCE

Orange Paligraf® is a very low resistance staple.

It's been designed to maintain wires in the first passage of trellising.

One staple between each post is enough to maintain wires.

It degrades very fast, in order to be replaced, in the 2nd passage, by the definitive staple. It is adapted in high vineyards.

## Advantage

Special 1st passage  
Regularity in degradation

## Packaging

8 bags of 2 000 pieces

## Staples setup recommendations

One staple between each post

Space between wires : 20 mm

Thickness : 2,7 mm

Wires entry : 6,9 mm

Ø Maximum wires diameter : 4 mm

Real size  
staple

Length : 28 mm

Height : 16,2 mm

Initial average resistance : 10 Kg

Degrades very fastly
