

Elioclip® 20mm 100% Vegetal is the biodegradable vine staple of the Multiclip range.
It is part of a sustainable development approach.

Its complete biodegradation takes place over the year in situ
and enters the humification cycle.

Elioclip® 20mm 100% Vegetal is recommended in high vineyards,
with medium to high constraints.

Advantages

100% Vegetal
100% Biodegradable
Full Biodegradation
in situ over the year

Real size Staple

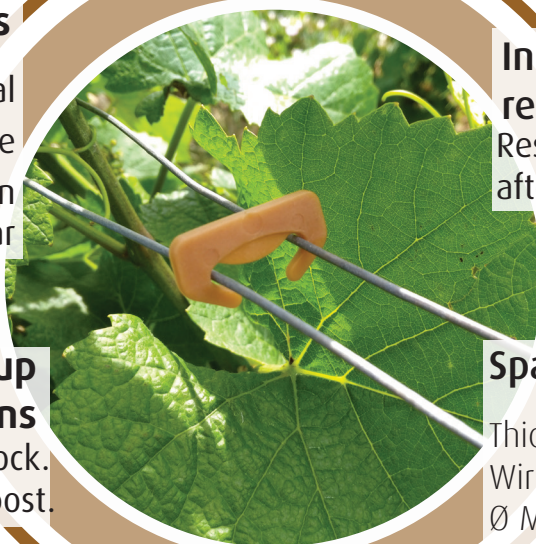

Length : 33,7 mm
Height : 16,7 mm

Initial average
resistance : 13 Kg

Residual resistance measured
after one season: 0kg

Staples setup recommandations

One staple between each stock.
No staple between stock and post.

Space between wires : 20 mm

Thickness : 2 mm

Wires entry : 8,7 mm

Ø Maximum wires diameter : 4 mm

Packaging

Bucket of 3 300 pieces
