

# SUPERGRAF®

## degradable

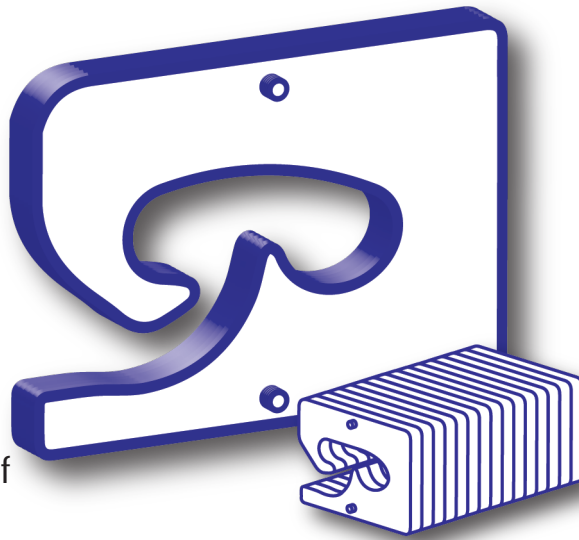

Supergraf® is a degradable clip delivered in 70 pieces feeder. These feeders were designed to be used with DMP trellising machines.

### Main advantage

Regular and reliable assembly of clips without any adjunction of adhesive or solvent.

Its resistance suits the use of foliage twine.

### Packaging

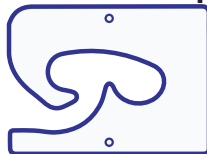

256 feeders of 70 pieces per cardboard  
17 920 clips

### Clips setup

We recommend that clips are placed centrally between vines in the trellis bay, though not adjacent to the trellis post

### Real size clip

Length : 26,5 mm  
Height : 20 mm

Space between wires : 15 mm

Thickness : 1,8 mm

Wire inlet : 8 mm

Maximal diameter of the wire : 3 mm

Average initial resistance : 12 Kg

Residual resistances after one season :

- Highest : 2 Kg
- Lowest : 0 Kg
- Average : 1,3 Kg
