

# A 40 FIX<sup>®</sup>

## permanent

A 40 FIX<sup>®</sup> is a permanent clip.  
One of its side stays on the wire outside the season of tying up.  
When it's time to tie up, you only need to move  
the second wire to hold the vegetation.  
The clip can be spotted in the vegetation thanks to its blue color.

### Advantages

Stays in position on the wire

### Clips setup

We recommend that clips are placed centrally between vines in the trellis bay, though not adjacent to the trellis post

### Packaging

Cardboard of 6 000 pieces  
or  
Bucket of 1 500 pieces

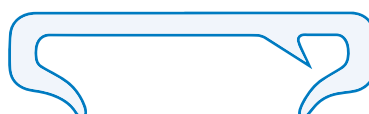

Space between wires : 40 mm

Thickness : 3,5 mm

Wires entry : 27 mm

Ø Maximum wires diameter : 4 mm

### Real size

Length : 49 mm

Height : 15 mm

Initial average  
resistance : 13 Kg
