

# BIODEGRAF®

degradable

ORANGE

Orange Biodegraf® is a very low resistance clip.

It's been designed to maintain wires the first passage of trellising.

One clip between each post is enough to maintain wires.

It degrades very fast, in order to be replaced, in the 2nd passage, by the definitive clip.

Adapted to all kind of vines.

## Advantages

Special 1st passage  
Adapted to all kind of vines  
Regularity in degradation

## Packaging

10 bags of 2 500 pieces

## Clips setup

One clip between each post  
to maintain wires

Space between wires : 15 mm

Thickness : 1,7 mm

Wires entry : 5 mm

Ø Maximum wires diameter : 3,6 mm

## Real size

Length : 22,8 mm

Height : 15,8 mm

Initial average resistance : 10 Kg

Degradation in 3 weeks.
